

Re-Engineering the Home Building Industry: The Past and Future of Residential Construction

Principal Authors: Prof. Fred Abernathy, Dr. Kermit Baker,
Dr. Kent Colton and Prof. David Weil

- I. Introduction
 - a. Residential Home Building
 - b. Studying the Home Builder Sector
 - c. Building a Typical Entry-Level Home
 - d. Builder Consolidation and the “Virtuous Circle”
 - e. Research Design
 - f. The Bottom Line
 - g. Organization of the Monograph

- II. Recent Changes in the Home Building Industry as it Enters an Era of Consolidation
 - i. *Home Builder Consolidation*
 - ii. *Municipal Land-Use Regulations*
 - iii. *Changing Market Conditions*
 - b. Evolving Industry Environment and Builder Performance
 - c. Studies of the Benefits of Consolidation
 - d. Drivers of Builder Profitability
 - i. *Managing Across Multiple Markets*
 - ii. *Using Market Power Effectively*
 - iii. *Using the Same Systems and Procedures*
 - iv. *Managing Operations to Local Market Conditions*
 - e. Research Approach: Operational Enhancements as a Source of Improved Performance
 - i. *Corporate and Divisional Scale of Operations*
 - ii. *Local Market Conditions*

- III. The Importance of Land Assembly Strategies
 - a. Builder Practices Regarding Aggressive Land Strategies

- IV. Coordination and Construction: Labor and Subcontracting in Residential Home Building
 - a. Coordinating the Residential Construction Site
 - b. What Do Home Builders Do?
 - c. The Benefits and Costs of Improved Coordination
 - d. Coordinating the Subcontractor
 - i. *Awarding Work to Subcontractors*
 - ii. *Consolidating the Subcontractor Base*
 - iii. *Coordinating Construction at the Building Site*
 - e. Impact of Home Builder Coordination on Costs and Lead Times
 - f. Conclusion

- V. Builder Practices Related to Preassembly, Supplier Installation, Supply Chain Management and e-Commerce/IT
 - a. Evolving Builder/Supplier Relationships
 - b. Shifting Builder Priorities

- c. Corporate vs. Divisional Responsibilities
- d. Evolving Dealer Services to Builders
- e. Implementation of Preassembly, Supplier Installation, and Advanced Supply Chain Practices
- f. Factors Influencing the Implementation of Advanced Practices
- g. Adoption of Advanced Supply Chain Practices and Local Market Conditions
- h. Market Characteristics and Builder Performance
- i. Outlook for Builder Supply Chains
- j. Use of E-Commerce and Information Technology by Home Builders
- k. Information Technology Use
- l. Information Sharing in the Supply Chain

VI. Why Consolidation Has Not Affected Builder Performance

- a. Introduction
- b. Is Bigger *Ever* Better?
 - i. *Scale and Operational Efficiency*
 - ii. *Securing Capital*
 - iii. *Is it the Land, Stupid?*
 - iv. *Consumer Experience and Product Branding*
 - v. *The Bottom Line*
- c. The Importance of Local Markets Revisited
- d. One Company, Many Markets
- e. Can Bigger Ever Be Better?

VII. Improving Home Builder Performance: Gaining Advantage from Scale

- a. Introduction
- b. Increasing the Benefits from Scale in Production and Assembly
 - i. *Lessons from Auto and Computer Assembly*
 - ii. *Applying Assembly Lessons to Home Building*
- c. Managing Home Building Enterprises Using Information Technology
 - i. *IT and Productivity in American Industry*
 - ii. *Integrating Information Technologies in Home Building*
- d. Improving Subcontractor Coordination
 - i. *Coordinating Subcontracting in Other Industries*
 - ii. *Coordination and Contract Management in Home Building*
 - iii. *High Roads and Low Roads in Human Resource Policy*
 - iv. *Human Resource Policy and Construction*
- e. Transforming Supply Chain Management and Logistics Practices
 - i. *Learning from Wal-Mart and Toyota*
 - ii. *Reforming Supply Chain Practices of Home Builders*
- f. Managing Risk in the Twenty-First Century

VIII. Bibliography

IX. Appendix: Survey of Home Builders

- a. Corporate and Divisional Surveys
- b. Geographical Coverage
- c. Industry Advisory Committee Members
